

Twist off (no squeeze) Gilbertson PVC Bluebird Nest Box modification

Assembly

Roof

Drip line grooves 1/8" deep,
5/8" in from edge, three sides

23/32" hole X 1 3/4" deep
through wood block, center as
shown, do not penetrate roof
(pole conduit attachment)

Shaft of screws 4 1/8"
apart, square-bend hooks 1-3/8",
position so that PVC box is
centered side to side on roof,
screw in square-bend hooks
until hook is 3/8" above surface

Drip line groove 1/8" deep, 5"
diameter circle, position to
center PVC body inside circle

4 1/2" left side, 4 1/8" right side. 'L'
shaped slots on top edge of box
need to align (same offset) left and
right as the square-bend hooks.

Wood 1 1/2" X 1 3/4" by 7 1/4" long
(wood block)

#8 X 3/4" self-tapping sheet metal screw,
installed when attaching conduit, into conduit

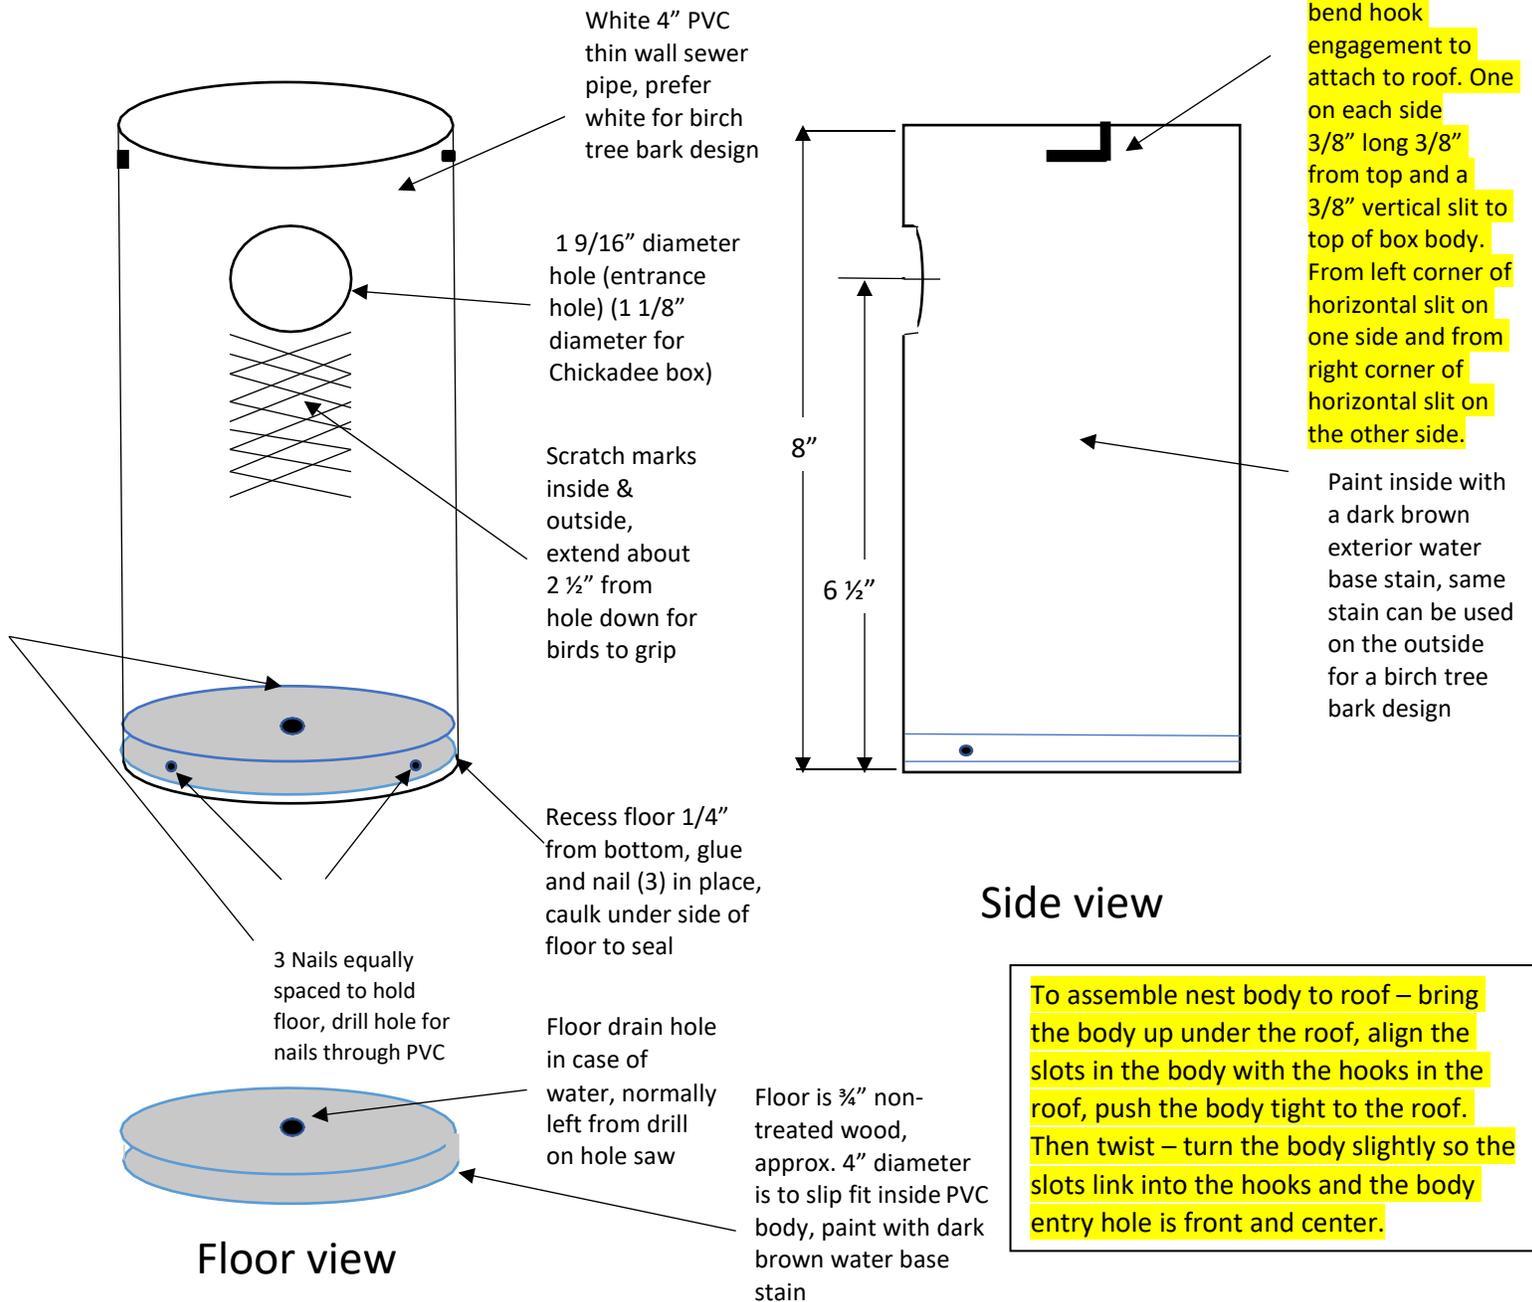

Attach roof to wood block using
exterior glue and two #8 X 1 1/2" coated
deck screws installed from the topside,
drill pilot holes

Roof - 3/4" PVC (recommended)
or Cedar - 8 1/2" X 7 1/4"

Material List for Roof

- 1 - 8 1/2" X 7 1/4" X 3/4" Cedar or PVC (PVC is recommended) PVC house trim works well (roof)
- 1 - 1 1/2" X 1 3/4" X 7 1/4" Cedar or other wood (a 2X 4 cut in half works well), paint if not cedar (wood block)
- 2 - Square-bend hooks 1-3/8" (for PVC nest body attachment)
- 2 - Coated deck screws #8 X 1 1/2" (attach roof to wood block)
- 1 - Self-tapping sheet metal screw #8 X 3/4" (for pole attachment)
- 1 - Small amount of exterior glue (roof to wood block)
- 1 - Pole assembly

Nest Box Body

Material List for Nest Box Body

- 1 – 4" thin wall PVC sewer pipe 8" long (prefer white) Material spec. ASTM2729 PVC (purchase at ACE Hardware)
- 1 – 3/4" thick X approx. 4" diameter non-treated wood (floor)
- 3 – Small tack nails to attach floor (about 1/2" long)
- 1 – Small amount of exterior glue to attach floor
- 1 – Small amount of dark brown exterior caulk to seal edge of floor
- 1 – Small amount of dark brown exterior water base stain for inside body and if desired exterior birch bark pattern
